

KYOKA®

Coco fiber floor tile

Mulching floor tile
100% natural and
biodegradable

- Reduction of germination rate of weeds while limiting the use of herbicide
- Better recovery of plants
- Installation adapted to all types of stakes

DISTRIBUTION

Vitalter

KYOKA®

Coco fiber floor tile

**100 % NATURAL
100 % BIODEGRADABLE**

TECHNICAL DATA

Composition	Dimension	Conditioning
Coco fiber (<i>Coco Nucifera</i>) bound by natural latex	25 cm x 25 cm (625 cm ²)	Box of 200 floor tiles

KYOKA® can be used in organic agriculture in application of RCE N°834/2007.

REDUCTION OF GERMINATION RATE OF WEEDS

- Reduces the use of herbicide
- High fiber density (1200g/m²) which ensures the opacity
- High content of lignin (85%) guaranteeing the sustainability of the **KYOKA** fiber floor tile

BETTER RECOVERY FOR VINE PLANTS

- Air and water permeability
- Limits water stress
- Reduction of potential competition caused by weeds

ADAPTED INSTALLATION

- Pre-cut central opening to allow passage of plants and stakes
- It's a complement to mechanical soil work (inter-vine hoes...)
